

A Comprehensive Community Outreach Program for the University City/Golden Triangle Area

Over the next five years, more than 50 major public, private, and transportation infrastructure projects are underway or planned for the University City/Golden Triangle community that can impact traffic flow and daily commutes. The Shift program is designed to provide residents, businesses, and commuters impacted by construction with information and resources to minimize disruption, confusion, and potential traffic challenges, as well as provide transportation solutions. Additionally, the program will serve as a unique hub for coordination and communication between the construction teams involved with each major project.

Program Partners

Shift is a growing multi-agency collaboration currently including SANDAG, Caltrans, the City of San Diego, MTS, the University of California, San Diego, and stakeholders throughout the University City/Golden Triangle community committed to keeping residents, businesses and commuters informed.

Shift your way of traveling

In addition to information regarding construction impacts, Shift provides guidance on transportation solutions to ease daily commutes including: carpooling, vanpooling, biking, walking, taking transit and other mobility options.
